PROFESSIONAL SUMMARY

Product Management candidate with a background in legal research, stakeholder communication, documentation, and AI-enabled prototyping. Skilled at breaking down ambiguous problems, mapping workflows, writing product-style documentation, and building MVPs. Strong fit for entry-level product roles requiring research depth, clear communication, and practical AI fluency.

SKILLS

Product Management: PRDs, Requirement Gathering, Journey Mapping, MVP Scoping, Prioritization, Roadmapping, Competitor Research

Research & Analysis: Legal Research, Workflow Mapping, Qualitative Research, Documentation, Risk Assessment, Structured Problem Solving

AI & Prototyping: Gemini API, Prompt Engineering, n8n, Lovable, Replit, Cursor, React Native/Expo basics

Tools: Figma, Jira, Miro, Google Workspace, Notion

Communication: Stakeholder Communication, Client Communication, Written Documentation, User-Facing Explanation

PROJECTS

PaperLoop — AI-Assisted Exam Paper Creation Tool, *Prototype / Independent Product Project*

- Conducted teacher/tutor discovery and prioritized scan-to-PDF as the first MVP workflow.
- Mapped the journey from handwritten draft → scan → review/edit → format → export/share, prioritizing scan accuracy, editing control, and PDF output.
- Built a functional React Native prototype using Gemini Vision AI to convert handwritten exam content into structured, PDF-ready outputs.
- Designed a scan-token pricing concept with failed-scan protection to reduce payment hesitation around unreliable AI outputs.
- **Tech Stack:** React Native, TypeScript, Expo, Google Gemini API, RevenueCat.

Product Documentation & Case Work

- Created PRD-style notes covering problem framing, target users, MVP scope, workflows, success metrics, and tradeoffs.
- Practiced product teardown and competitor analysis across onboarding, activation, retention, pricing, and monetization patterns.

PROFESSIONAL EXPERIENCE

Independent Product Builder & PM Trainee

04/2025 – Present

- Built and documented AI-enabled product prototypes while completing Product Management & Agentic AI training.
- Practiced PRD writing, journey mapping, MVP scoping, market research, competitor analysis, and prioritization.
- Used Gemini API, Figma, n8n, Lovable, Replit, Cursor, and React Native/Expo basics to translate ideas into testable workflows.

Legal Associate, *Independent*

11/2021 – 07/2024 | Kolkata

- Conducted legal research, analyzed complex case material, and converted ambiguous information into structured arguments, documentation, and client-ready summaries.
- Managed client and stakeholder communication by simplifying technical/legal concepts into clear next steps and expectation-setting.
- Prioritized multiple active matters with competing deadlines while maintaining accuracy, documentation quality, and process discipline.

EDUCATION & CERTIFICATION

B.A.LL.B, *University of Calcutta*

07/2015 – 10/2020 | Kolkata

Product Management & Agentic AI, *Masai School in partnership with IIT Patna Vishlesan I-Hub Foundation*

04/2025 – 01/2026

Completed an intensive program focused on product strategy, agile execution, AI workflows, product documentation, and integrating AI solutions into product pipelines.
